PROJECT BLUE

A group of high school students from ECC had recently visited HCC India. They wanted to know the seriousness of water issues in India. They will be part of a youth event during 2015 and pave way for the youth of the ECC to be part of an amazing

movement. They will speak to the youth in the event about the Indian situation and encourage their support and involvement towards —

Project Blue. It will be a project to address water situation in few villages of India.

A child performs her dance while others wait for their turn. It was a recreational program arranged at Daund.

These are child laborers. While some work at brick making sites, other support parents in their works.

HCC carries out a project with Equemenia for such children to *restore their lost childhood.* The project is ongoing for children at Chopda, Gulbarga and Pune too.

RESTORING CHILDHOOD
